

# Sales Tax Tokens

## PRICES

by Jerry F. Schimmel

## Introduction

For collectors familiar with the Sales Tax Token collecting field, the use of this booklet should pose no problem. Those who are new to the series will need to have access to at least the following two works, the first of which is out of print at this writing:

**CHITS, CHISLERS AND FUNNY MONEY** by Michael G. Pfefferkorn and Jerry F. Schimmel, Scorpion Publishers, Amherst NY 1977

**U.S. STATE-ISSUED SALES TAX TOKENS** by Jerry F. Schimmel, Paul Cunningham Publications, Tecumseh MI 1980

In addition other works can be of help:

**CHECK LIST AND GUIDE TO SALES TAX TOKENS** by Emil DiBella American Tax Token Society 1971 (There are several earlier versions still available as well.)

**Provisional Sales Tax Tokens of Illinois** by Charles Lipsky in **NUMISMATIC SCRAPBOOK MAGAZINE** July 1959

**AMERICAN TAX TOKEN SOCIETY NEWSLETTER** various back issues beginning 1970.

**JERRY F. SCHIMMEL AUCTION SALES** back sales beginning November 1982 and **PAUL CUNNINGHAM AUCTION SALE** October 24, 1981

## Grading

**UNC or Uncirculated:** Metal tokens should be brilliant with no evidence of handling. There should be no carbon or oxidation spots. Copper and brass pieces can be toned evenly over the piece, not blotchy. There can be no fingerprints.

Fiber and cardboard pieces should be crisp and have no shiny spots on the high points. Cardboard edges should be crisp, sharp and not bent. Pieces with a glossy or semi-gloss finish should have no hairline marks.

Glossy plastic tokens will be brilliant overall and the edge mold extrusions will show no signs of having been handled. Semi-gloss plastic pieces should be examined closely for hairlines on the rims. If the collector has any doubts about a token meeting these standards, then it should be graded as EF.

**EF or Extra Fine:** Metal pieces should generally be brilliant but may have fingerprints, tiny carbon or oxidation spots, light handling marks on the highest points and mild toning not necessarily evenly distributed.

Fiber and cardboard pieces may have small shiny spots on the highest areas and edges. On those with a gloss or semi-gloss finish there may be hairline scratches. Edges may begin to "fuzz" and corners may be slightly bent. On plastic pieces fine hairlines are visible under a glass, especially on the rims.

**VF or Very Fine:** Wear is evident on these pieces although there should still be areas of lustre. Fiber and cardboard pieces will have noticeable shiny or dirty spots on the high areas, but the overall color of the pieces will not be affected. Cardboard pieces will be somewhat dirty and rectangular tokens may be a bit dog-eared. Edges will have noticeably "fuzzed." Rims may be slightly dirty on plastic tokens.

Most tax tokens, unless they are among the scarce, will be worth only pennies if they are in grades lower than the above.

III: AUCTION PRICES REALIZED FOR MISCELLANEOUS OTHER  
SALES TAX ISSUES

=====

The listings below were taken primarily from my auction sales in the 1980's. State and metal Provisional issues are not included, nor are items which sold under one dollar. Mostly this list is of several of the other major Sales Tax Token collecting areas and is not intended to be complete. The columns at the right are the year of the sale and the number of the auction. The letter C found in the column at the far right refers to Paul Cunningham's 1981 sale of my personal collection.

## **A Note To Tax Token Collectors:**

It doesn't seem like twelve years since Mike Pfefferkorn and I finally got **Chits, Chislers and Funny Money** together. Putting a book like that together is always a combination of adventure and frustration, especially when two people are trying to be a joint author. It's bad enough when one person does a book.

Pulling the data out of my back sales for this booklet really took me back to the time when the **American Tax Token Society** got started and all of the people I knew back then like Jerry Bates (now deceased), Mike, Ernie Altvater and George Frakes (from neither of whom have I heard for years), having a brief meeting with Dick Johnson (who is auctioning medals somewhere in New England) and many others with whom I was much closer back then and now am not.

I never met Emil DiBella, but I did get to know George W. Magee whose very careful work antedated that of DiBella. George just seems to keep going.

The **American Tax Token Society** is still carrying on and like any volunteer group has its ups and downs. Right now it is having one of it ups and quite a good "up" it is. Readers are urged to get in touch with that organization. As of this writing the two persons that can help introduce you to the club are:

Tim Davenport  
ATTS Business Office  
7512 NE Bothell Way #127  
Bothell WA 98011

Merlin Malehorn  
Editorial Office  
6837 Murray Lane  
Annandale VA 22003

I don't want to bore you with more sentimental meanderings, but my association with Tax Tokens has been an interesting and fruitful one over the years since 1969 and I have enjoyed my contacts with all of you.
